Dear Sir/Madam,

Hope this letter finds you well. I would like to take this opportunity to introduce myself as a professional in the software industry with almost 1 years of experience as a fresher in the development domain. I am graduating in April 2024 from ICFAI University, pursuing a Bachelor's in Technology in Computer Science & Engineering with an excellent academic record. I am looking for full-time permanent positions with an esteemed organization that allows me to employ my abilities to meet company vision and mission.

Adapting to various work cultures, identifying bottlenecks, and prioritizing have been the striking features of my working style. In addition to the above, I strongly believe in learning and sharing my knowledge with colleagues. Moreover, I stand to the point that an organization or team can grow with all players working together. I am keen on learning and adapting new technologies to sharpen my skills at troubleshooting and solving problems.

I am confident that my background and knowledge in the Computer Science area along with my strong technical & problem solving skills and work ethics will prove an important and immediate value to your organization.

I have enclosed my resume and would appreciate an opportunity to talk with you. Should you have any further concerns or questions, please feel free to contact me. I look forward to hearing from you soon.

Cordially,  
Anurag
